

Creating a Survey

Navigate to the web application in your browser. Create an account and log in. Once logged in choose create a survey. Add questions from this screen and then save the survey. Once the survey has been created you need to assign it to a mobile user.

Assign a Survey

In the web application navigate to the dashboard, choose manage mobile users from the menu. Create a mobile user. Navigate to back to the dashboard and choose manage surveys. Choose a survey from the list. Now scroll down that survey and choose assign survey. Assign the survey to a mobile user.

Conducting a Survey

Log in to the Android application with the mobile user that you have just created. A list of surveys appears once you have logged in. Tap on one to begin.

Viewing Results of a Survey

Once a survey has been completed couple of times on the Android tablet you can go back and view the responses to it in the web application. Log in to the web application. From the dash navigate to manage surveys, scroll down to the questions and choose View Responses. Each question's response data will be represented appropriately, either paginated or in a pie chart.
